Experiments
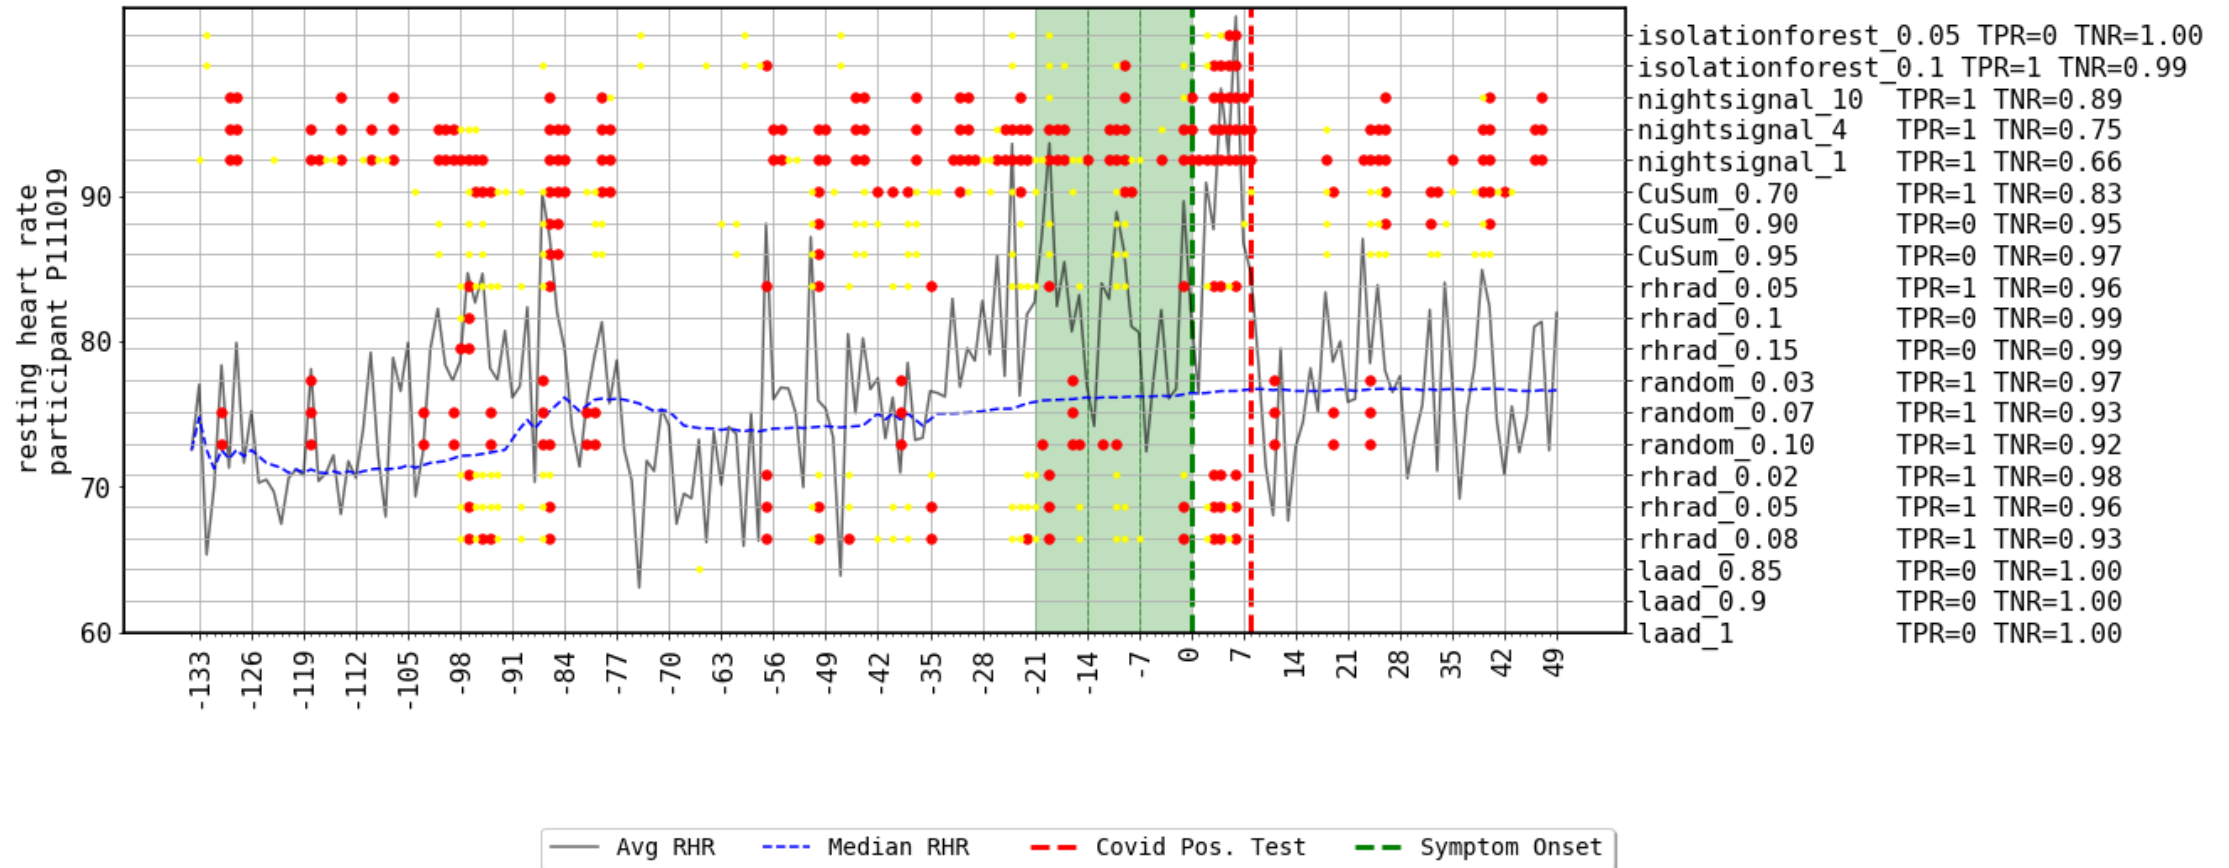

Please open Run-Different-methods.ipynb then Covid-Result-Viewer.ipynb

It will download the dataset and run it with different methods. In the Covid-Result-Viewer.ipynb you can see the result.
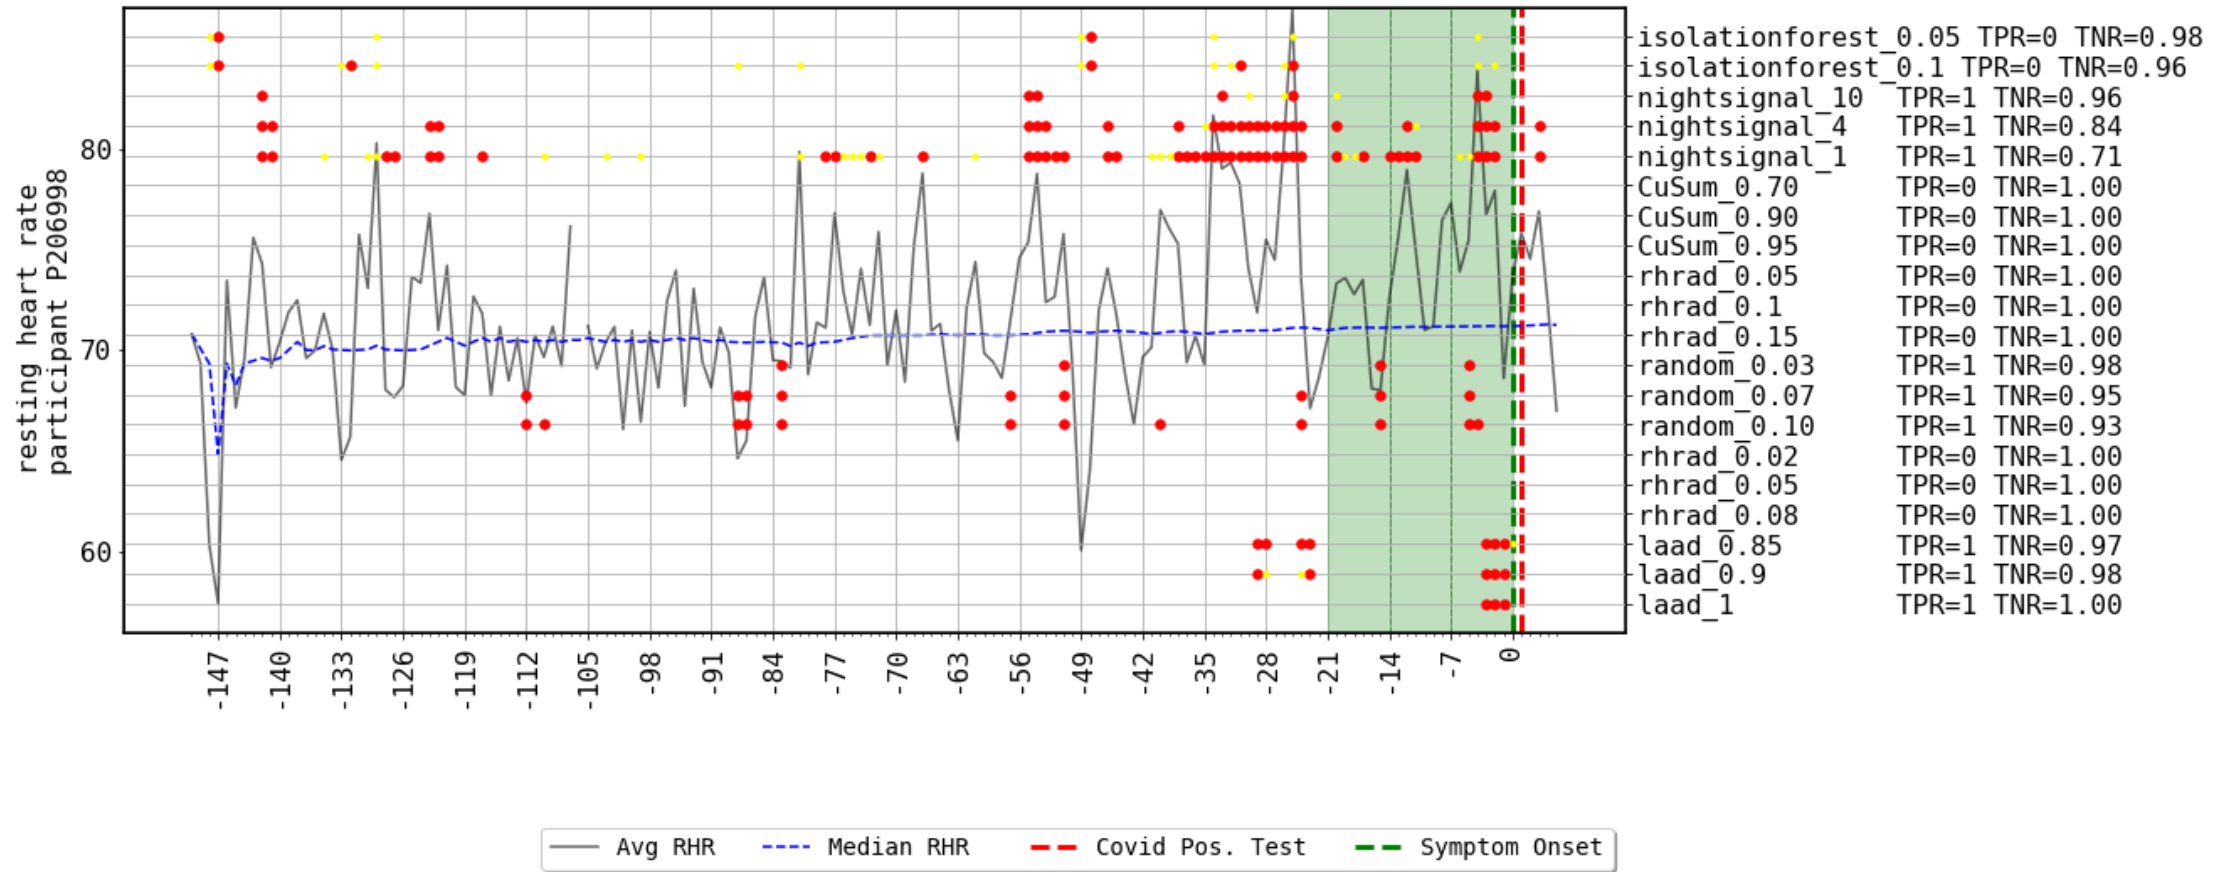

Contents

- Generated Alarms for different Participants and different Algorithms
- Different Evaluation Method
- TPR of different methods using Nature eval by various infection window size
- ROC using Nature and Our metric

# Alarms Generated for P111019

Alarms Generated for P206998
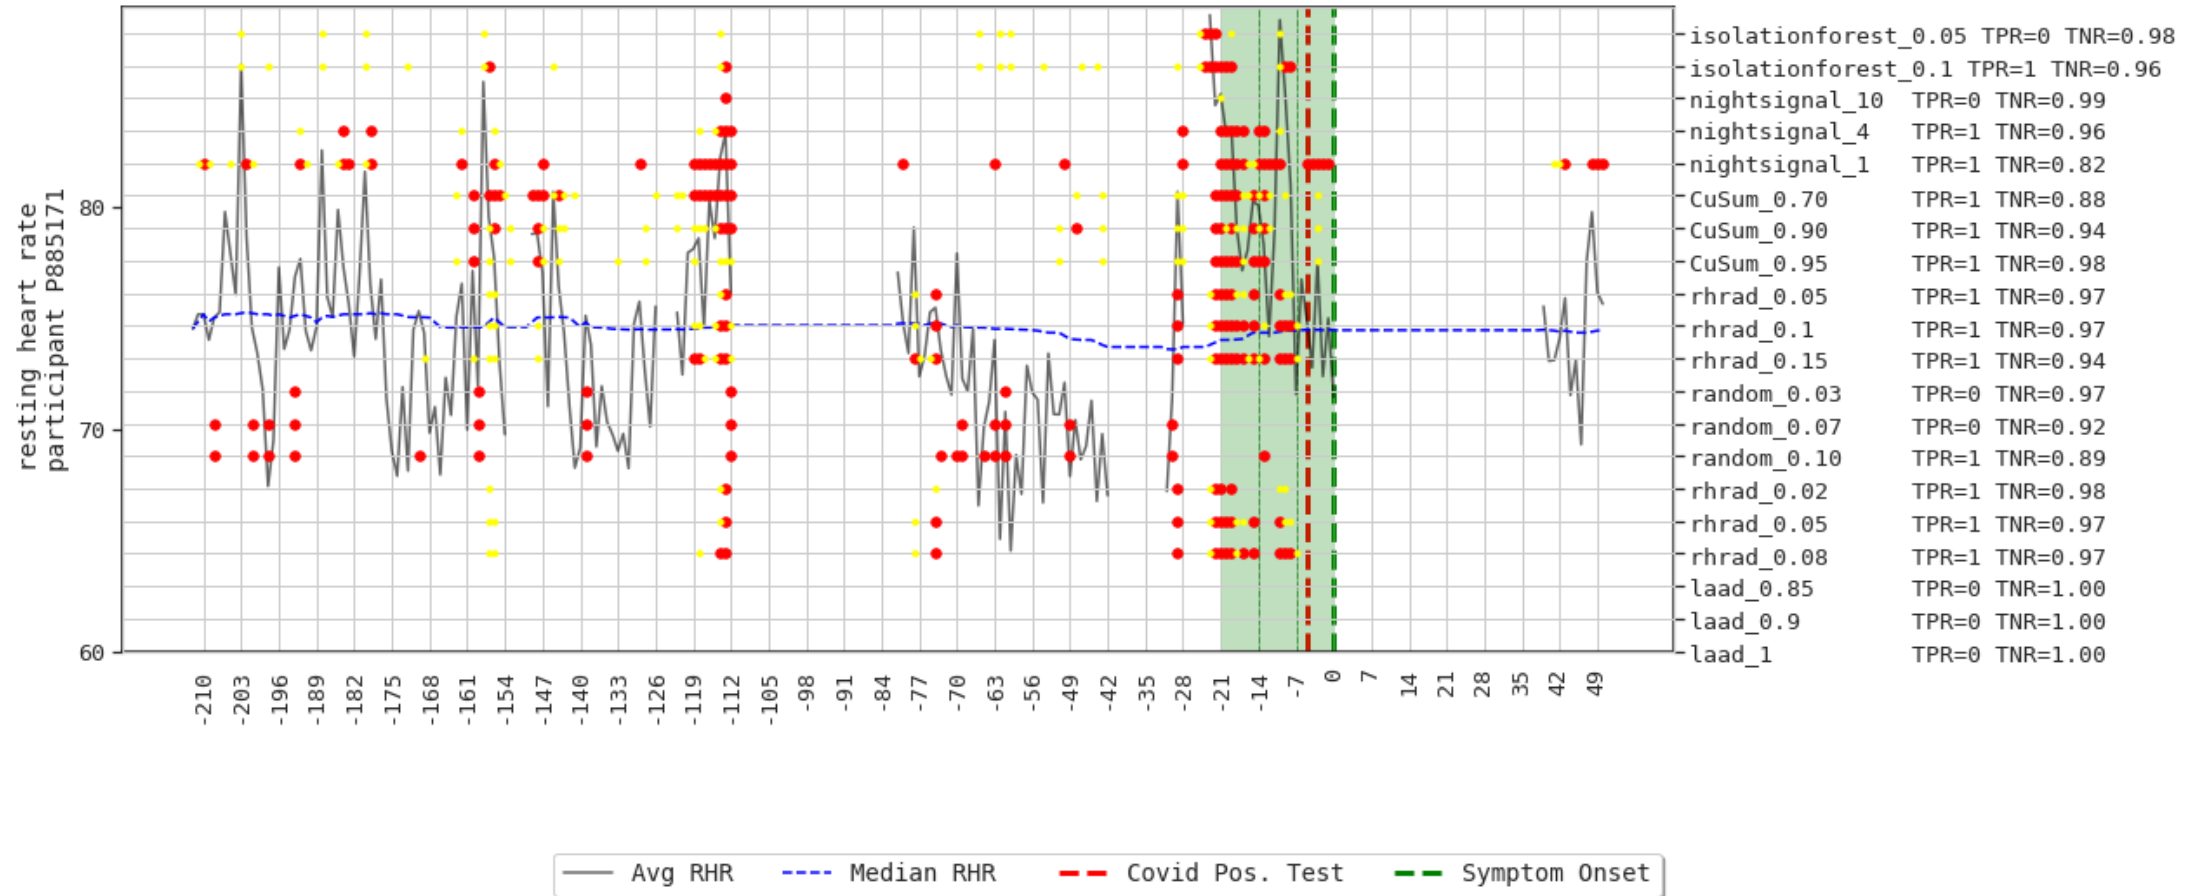

Alarms Generated for P543995

Alarms Generated for P693795

Alarms Generated for P708653

Alarms Generated for P885171

# Different Evaluation Method
## Nature   vs   Our

TPR of different methods using Nature eval by various infection window size

ROC using Nature and Our metric

(a) Nature Metric

(b) Our Metric
